NOTES

A. **GENERAL STATEMENT**

The Board's general authority is granted under the Public Resources Code, which requires all Board members to "represent the general public interest". Board membership consists of nine individuals appointed by the Governor, and confirmed by the Senate. Each member serves for four years in staggered terms, and each must have a demonstrated specialty in either geology, seismology, mining engineering, hydrogeology, the environment, mineral resources, landscape architecture, or government.

The Board has specific responsibilities under the following acts:

Alquist-Priolo Earthquake Fault Zoning Act -- Under this Act, the Board is authorized to represent the State's interests in establishing professional practice guidelines and standards for geological investigations and reports produced by the California Geological Survey, public sector agencies, and private practitioners, and to develop specific criteria through regulations that shall be used by affected local jurisdictions in complying with the provisions of the Act so as to protect the health, safety and welfare of the public.

This Act (Public Resources Code, Chapter 7.5, §2621 through §2630) is intended to provide policies and criteria to assist cities, counties and state agencies in the exercise of their responsibilities to prohibit the location of developments and structures for human occupancy across the trace of active faults as defined by the Board. Further, it is the intent of this Act to provide the citizens of the State with increased safety and to minimize the loss of life during and immediately following earthquakes by facilitating seismic retrofitting to strengthen buildings, including historical buildings, against ground shaking.

Seismic Hazards Mapping Act -- Under this Act, the Board is authorized to provide policy and guidance through regulations for a statewide seismic hazard mapping and technical advisory program to assist cities, counties, and state agencies in fulfilling their responsibilities for protecting the public health and safety from the effects of strong ground shaking, liquefaction or other ground failure, landslides and other seismic hazards caused by earthquakes, including tsunami and seiche threats.

The Seismic Hazards Mapping Act (Public Resources Code Chapter 7.8, §2690 through §2699.6) establishes the authority to provide programs to identify and map seismic hazard zones in the State in order for cities and counties to adequately prepare the safety element of their general plans and to encourage land use management policies and regulations to reduce and mitigate those hazards so as to protect public health and safety.

Surface Mining and Reclamation Act of 1975 -- The extraction of minerals in a responsible manner is essential to the continued economic well-being of the State and to the needs of society, and the thoughtful reclamation of mined lands is necessary to prevent or minimize adverse effects on the environment and to protect the public health and safety.

Under various statutes, the Board is authorized to represent the State's interests in the development, utilization, and conservation of the State's mineral resources, the reclamation of mined lands, and Federal matters pertaining to surface mining within the State.

The Surface Mining and Reclamation Act of 1975 (SMARA, Public Resources Code, §2710 through §2797) provides a comprehensive surface mining and reclamation policy with the regulation of surface mining operations to assure that adverse environmental impacts are minimized and mined lands are reclaimed to a usable condition. SMARA also encourages the production, conservation, and protection of the State's mineral resources. (Public Resources, §2207, provides for the annual reporting requirements of this statute, under which the Board also is granted authority and obligations).
